## 1HFY10 Results Review

# Hai-O

### Unbeatable

Hai-O has, once again, reported a solid set of numbers. Revenue and net profit jumped 40.3% and 57.8% y-o-y respectively, mainly due to higher sales from its MLM and retail divisions. 1HFY10 margins expanded by 2.6%-pts y-o-y on higher sales of higher margin products and lower raw material costs. In addition to its excellent results, Hai-O has proposed: (i) a 1-for-5 bonus issue, (ii) 1-into-2 share split, and (iii) a private placement, which we believe would increase the stock's attractiveness and liquidity in its shares. Hai-O remains as one of OSK's 2010 top picks.

**More superb results.** Hai-O posted another stellar performance, with 1HFY10 revenue and net profit leaping 40.3% and 57.8% y-o-y to RM280.9m and RM38.7m respectively, making up 61% of our full year estimates and 56% of consensus'. The solid results stemmed from the strong momentum in MLM (+51.9% in revenue y-o-y) in 1HFY10, spurred mainly by the increase in revenue/distributor and membership by about >40,000 y-o-y. Other than the star performing MLM segment, its second largest revenue contributor – the retail division - also saw positive growth of 3.9% on higher operating floor space by ~4,500 sf. Although sales from the manufacturing and wholesale segments fell 31.6% and 12.4% y-o-y, the negative impact on overall sales is negligible given their minimal cumulative contribution of some 7%. Sales were also fuelled by higher other income, including rental income from leasing of land in Klang and the realization of exchange fluctuation reserves on disposal of foreign associates of RM624,799. Y-o-y EBIT margin was 2.6%-pts higher, fuelled by higher margin products and a stronger RM, which led to lower raw material cost. Q-o-q, despite the lower overall revenue recorded (-10.9%), Hai-O posted better earnings growth (+25.8%) by focusing on higher margin products.

**Improving share liquidity.** Hai-O has proposed (i) a 1-for-5 bonus issue involving the issuance of up to 16.8m shares, (ii) 1-into-2 share split, and (iii) private placement of up to 10% of its enlarged issued and paid-up capital. After the proposed exercises, Hai-O's minimum paid-up capital would be raised to RM111.2m comprising 222.4m RM0.50 shares and the shareholding of the largest shareholder, Mr Tan Kai Hee, would be reduced from 9.73% (not including indirect shareholding) currently to approximately 8.8%. While the exercise is dilutive (with our ex-all fair value at RM3.47 and upside dropping to 11% compared to 19% currently), it would improve the liquidity and attractiveness of Hai-O shares. The proposals are expected to be completed by 2Q10.

**Reiterate BUY.** As we believe there is further share price upside premised on its growth story, decent dividend yield and increased share liquidity, we reiterate our **BUY** recommendation at TP of RM8.95, which is based on 11x CY10 EPS.
