## Overwhelmed by strong direct marketing earnings

## MLM division likely to surprise on the upside for 2Q08

Hai-O is expected to report a robust 2QFY08 net profit – to be released in mid-Dec, underpinned by a stronger-than-expected MLM operations (67.6% of 1QFY08 revenue). Recall that Hai-O reported a 1QFY08 net profit of RM7.1m (+99.6% yoy, -9.1% qoq) on the back of revenue of RM59.3m (+50.6% yoy, +4.5% qoq), which already accounted for 26% of our previous full year FY08 forecast.

## Four major thrusts on MLM business

The robust MLM earnings is been driven by: 1) strong growth in new distributor force. Monthly members have on average more than doubled to 2,000-2,500/month from 1,000/month previously (total member force now approaching 70,000 from 60,000 in mid 2007), 2) increased awareness of Hai-O's products and offerings following its recent sponsorship of the popular "Jom Heboh" TV program on TV3; 3) Hai-O being a key beneficiary of the recent civil servants pay hike (+7.5 to +35%) as nearly 95% of Hai-O's distributor force comprises of Bumiputera, and 4) relatively easy consumer financing (micro-credit) programme offered by Bank Rakyat, etc. which enables members to leverage to rapidly build their MLM network.

## RM50m capex plan to enhance its pharmaceutical manufacturing division

Hai-O has recently proposed to purchase a 28-acre piece of land from Bata (M) Sdn Bhd (nearby its existing head office and factory in Jalan Kapar, Klang) to build a new pharmaceutical manufacturing plant, warehouse for its Pu-er tea storage and new office. This new building will only occupy approximately 30% of the vacant area with the remaining 70% occupied by Bata's factory and warehouse, which would be leased back to the latter on a 3-year renewal term. Total capex is RM50m (RM5m for the plant & new equipment and RM45m purchase price from Bata), and this will be funded partly by internal generated funds (RM25m) and borrowings or new share issue.

## Minimal EPS dilution

We however believe a share placement is more likely, lifting stock liquidity while taking opportunity to potentially lock in a strong institutional Bumiputera shareholder. EPS dilution would be mitigated by recurring rental income yields of 6%-7% and increased earnings contribution from its in-house manufactured brands which has seen increasing demand and carry even better margins vis-à-vis its imported brands.

**FY08-10 earnings upgraded by 17-18%**

All in, we have upgraded our FY08-FY10 EPS forecast by 17%-18% after raising our average revenue per agent to RM2,100 (previously RM1,900) on the back of higher number of distributors to 80k from 70k assumed for the MLM division. We have also raised the contribution from the manufacturing division. The revision yields a strong 3-year FY06-10 EPS CAGR of 26%. In tandem with the earnings upgrade, we have also raised our DPS forecast to: 19.2 sen in FY08 (from 16.6 sen), 22.4 sen in FY09 (from 20.0 sen) and 27.2 sen in FY10 (from 23.3 sen) on the assumption that management maintains a dividend payout policy of 50%. This translates to an even more exciting dividend yields of 6%-8%.

**Revised forecasts is 20% above street**

Our optimism on Hai-O is reflected by our above street FY08 net profit estimate. The 20% deviation against consensus, in our view, is due to: 1) our stronger forecast for Hai-O's MLM business, 2) higher contributions from its pharmaceutical manufacturing, and 3) recurring rental income from Bata with an estimated 6-7% rental yield or RM2m p.a.

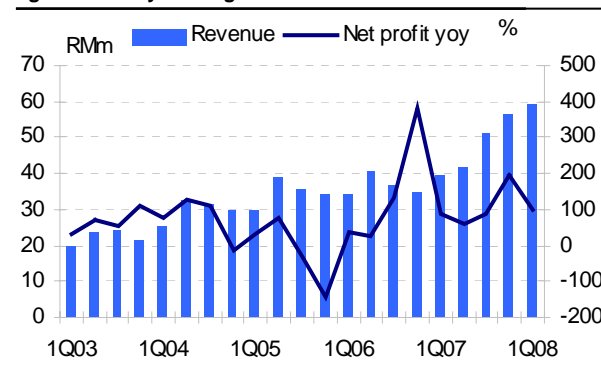

**Maintain BUY, target price raised to RM4.18 yielding a 31% upside**

Maintain BUY on the stock with a higher target price of RM4.18 (previously RM3.88) based on SOP. While stock price has performed reasonably well (+5.2% gain since our initiation coverage on 8 Oct 2007, and outperforming the market by +5.2%), we think that upside it is still early to lock in gains in lieu of the potential earnings enhancement from its stronger-than-expected MLM division and growing contribution from its existing and new pharmaceutical manufacturing plant. In short, we believe that the market has yet to fully appreciate the strong growth prospects of the company, with potential of earnings upgrade being a further re-rating catalyst. In addition, as a diversified consumer goods company (MLM, retail, wholesale, pharmaceutical manufacturing and Traditional Chinese Medicine) in Malaysia, we believe Hai-O will vastly benefit from improving domestic consumption spending.
